DETAILED ACTION

1. Applicant's election without traverse of Group II (claims 1, 8 and 9) in the reply filed on July 27, 2005 is acknowledged. Applicants canceled claims 2-7 (which are non-elected claims).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, applicants recite (in step (d)) that the optical change in the object is calibrated to *the dose of the energy* corresponding to each position scan. Applicants also recite that *the dose of the energy* in the object is mapped in step (e). It is not clear to the Examiner what applicants mean by "the dose of the energy" in each of those steps in (d) and (e). Do applicants mean the dose of the energy transmitted through the object, do they mean the dose of the energy absorbed by the object, or do they mean the dose of the energy (initially) applied to the object? Do applicants mean the same kind of energy in each of those steps in (d) and (e)? Also, it is not clear how the visual recording of the summation of the 2-dimensionl representations on the image display receiver is being done. Is the visual recording being done by using the energy transmitted through the object to the image display receiver (i.e., does the

polymerization of the activated oxyacetylene is carried out by using the energy transmitted through the object to the image display receiver?)?)

Appropriate correction or clarification is required.
